

The Municipal Waste Management Association

Fall Summit 2003

Detroit, Michigan

Kelly Hendryx, Source Control Bureau
City of Portland

Biographical Profile

Kelly is an Environmental manager for the City of Portland, Oregon. He has managed the Industrial Projects Section since 1994. In this capacity he is responsible for the modification of the Extra Strength Sewer Charge program. The change in program will result in a new rate structure for industrial and commercial customers that will better recover the cost for services and promote pollution reduction through organic composting. He is also responsible for the Alternative Discharge Control Program that is designed to allow innovative approaches for the elimination or control of pollutant discharges to the sanitary and storm sewer. Examples of these programmatic approaches are the Eco-Logical Business program for Automotive Services, the Silver program for Photo processors and preprint operations and the Dental program. He has several other processes that he manages such as the sanitary and stormwater review of new and reconstructed non-residential properties, batch discharges, cost recovery for sewer cleaning and repair and the industrial user survey. In these capacities he is responsible for policy, program development and implementation.

Prior to his current position Kelly has managed the pretreatment section and worked in sanitary engineering areas for the bureau of environmental services for the last 26 years.

Kelly's educational background is in Geology from the University of Oregon.
