

Cities that are interested in or already partnering with other local governments to advance climate solutions in the areas of electricity, buildings, or fleets

Large Cities (250,000+ people)

Madison	WI	250,000	Dane County convenes meetings with cities throughout Dane County.
Buffalo	NY	258,612	Buffalo's Energy Master Plan is part of the Five Cities Energy Plan, a collaborative strategy document that envisions a more energy efficient and sustainable future for the five largest Upstate New York cities.
Durham	NC	263,016	We are interested in exploring partnering with Durham County and other local governments to develop commercial scale solar farms, group purchasing, etc.
Chula Vista	CA	267,000	As a member of LGSEC we provide regulatory feedback to the state on measures related to clean energy. We are also a founding member of the San Diego Climate Collaborative and South Bay Energy Action Collaborative. We would be open to any other partnerships that can bring more clean energy to our community.
Toledo	OH	280,000	Toledo is currently working with Lucas County officials along surrounding area city governments on Further environmental issues. Additionally, The city works with Toledo Metropolitan Area Council of Governments (TMACOG)
Orlando	FL	282,000	We are participating in the Renewable Energy RFI and plan to collaborate with other cities to achieve our goals.
Anchorage	AK	296,000	As the local government, the MOA is working to install renewable energy on several locations and is considering a renewable energy goal through the Climate Action Plan.
Santa Ana	CA	338,000	City is member of the Orange County Cities Energy Efficiency partnership with SCE and SoCalGas, and sharing best practices including renewable energy solutions.
Oakland	CA	424,000	We are working with the other cities and County via the CCA program.
Raleigh	NC	458,880	The City actively participates in various public organizations that work to advance renewable energy and climate solutions at local, state, regional, and federal levels. The City maintains good working relationships with regional local governments as we work together on resiliency programs.
Long Beach	CA	470,130	The city of Long Beach is interested in partnering with local governments to advance climate solutions through renewable electricity. The City is currently researching and considering Community Choice Aggregation options that may lead to partnerships with other cities.

Kansas City	MO	478,000	The City will encourage other local governments to procure renewable energy thru KCP&L's new renewables program, when it is approved by the MO Public Service Commission.
Mesa	AZ	496,401	Municipalities are working with Salt River Project, the local utility company, to explore community renewable energy projects.
Las Vegas	NV	640,174	Yes, the City is interested in looking at opportunities to partner with other local and regional governments (as well as state agencies) to purchase, acquire, and develop renewable energy resources. It currently does so with the Colorado River Commission of Nevada.
Portland	OR	650,000	Portland participates in the League of Oregon Cities (LOC) and plays an important role in shaping the energy policy agenda of that group in Salem. We also participate in multiple peer city networks, such as USCM, C40, USDN, CNCA.
Boston	MA	685,094	The City of Boston is coordinating the release of a multi-city Request for Information to explore collective purchasing of renewable energy in order to bring down costs and incentivize more development, through a Virtual Power Purchase Agreement (VPPA). As well as major cities across the US, including Chicago, Houston, Los Angeles, Orlando, FL, Portland, OR and Evanston, IL, we have recruited several local governments: Melrose, Arlington, Somerville, Cambridge and Manchester, MA; Nashua, NH; South Portland and Portland, ME. The Metropolitan Area Planning Council, the regional planning agency serving the people who live and work in the 101 cities and towns of Metro Boston, has also signed onto the RFI.
Washington	DC	693,972	The District of Columbia works closely with the Metropolitan Washington Council of Governments (MWCOG) on a regional approach to mitigating GHGs. MWCOG represents 17 regional jurisdictions including and surrounding Washington, DC, and has established ambitious goals to reduce regional GHGs 20% below 2005 levels by 2020 and 80% by 2050 region-wide. The District has also partnered with MWCOG and several Federal agencies on climate adaptation planning activities, driven in large part by the now-rescinded Federal Executive Order 13653, which mandated that Federal agencies take actions to enhance climate preparedness and resilience. MWCOG supports local governments in developing renewable energy plans, policies, and initiatives, particularly for solar. Additionally, MWGCOG helps local government install renewable energy systems on municipal facilities, supports efforts to create a robust regional solar market, and seeks to foster more low-cost solar deployments. Beyond the region, the District is part of the C40 network of cities, the Carbon Neutral Cities Alliance, and 100 Resilient Cities and works in peer networks to advance climate and renewable energy solutions. For example, the District is part of a thermal decarbonization pilot program funded by CNCA in collaboration with three other leading-edge cities (NYC, Boulder, CO, and Burlington, VT) to

			study market potential and market deployment of air source heat pumps for the small residential sector.
Denver	CO	700,000	We work in partnership with U.S. and Canadian cities through the Urban Sustainability Directors Network and Climate Mayors, and with cities elsewhere through ICLEI Local Governments for Sustainability.
San Francisco	CA	890,000	San Francisco engages with regional, statewide, national and international local governments across all distributed energy resources topic areas (EE, RE, Storage, ZEVs). We also coordinate closely on decarbonization policy, regulation and initiatives.
Austin	TX	949,587	Public power association, and USDN
San José	CA	1,046,079	Mayor Liccardo is an active member of initiatives like America's Pledge and the Sustainable Cities Initiative, and groups like Climate Mayors, C40, the US Conference of Mayors, and Champion Mayors.
Phoenix	AZ	1,600,000	Working with AEE and other cities to perform group purchase through the utilities. Also working with the Urban Sustainability Directors Network which includes 150 North American cities.

Medium Cities (100,000 – 250,000 people)

Las Cruces	NM	101,000	working to get CCE for state with other governments and stakeholders
South Bend	IN	101,735	South Bend is involved in coalitions such as Michiana Area Council of Governments, Earth Charter Indiana Mayors' Climate Summit, and Indiana University's Environmental Resilience Institute, in Indiana, and several other national and international organizations, which provide support and networking to local governments pursuing climate solutions. Due to our involvement in these organizations, we are well-positioned to begin partnerships with other local governments.
Erie	PA	101,786	We are open to discussions on this topic.
Boulder	CO	108,000	Through dozens of regional, national and international partnerships and coalitions. Namely USDN, CNCA, and CC4CA
Lansing	MI	117,000	City is currently starting work on a sustainability plan which will include consideration of this item.
Columbia	MO	120,000	We do these efforts through the Urban Sustainability Directors Network
Columbia	SC	133,358	Economies of scale would be helpful for all involved.
Dayton	OH	141,000	Dayton Regional Green (DRG) Program partnership with Montgomery County.
Bridgeport	CT	145,000	Shared solar on a large scale

Torrance	CA	147,175	The City is working with the South Bay Cities Council of Governments to explore partnerships and programs with other local governments.
Alexandria	VA	150,000	City participates in regional climate initiatives led by MWCOG and NVRC
Clarksville	TN	150,287	same as above
Pembroke Pines	FL	162,000	Willing to participate
Fort Collins	CO	167,000	Through shared ownership (4 cities) for our electric generating authority; Through sharing best practices via numerous networks
Tempe	AZ	170,000	In discussions with neighboring cities about potential collaborations.
Salt Lake City	UT	192,672	Partnering on an upcoming RFP to secure a renewable energy resource via PPA for both public and private customers. Also, we coordinate extensively within Utah and nationally with local governments. One example is the NREL Solar Energy Innovation Network. Click here for more information
Aurora	IL	200,456	Aurora is part of the Metropolitan Mayors Caucus and the Fox Valley Sustainability Network to create a healthy, sustainable and vibrant environment.
Rochester	NY	210,000	The City can build on existing partnerships local and regional governments to advance climate solutions focused on renewable electricity. Examples of existing partnerships are as follows. The City helped to implement the Finger Lakes Regional Sustainability Plan, developed as a collaborative regional project through the NYSERDA Cleaner Greener Communities Program in 2013, and will continue to engage with Monroe County, Genesee Finger Lakes region and Upstate New York communities to share best practices to continue to work together to strengthen the climate resiliency of the region. The City has been part of the New York Power Authority's (NYPA) Five Cities Energy Program, a partnership which includes Rochester, Albany, Buffalo, Syracuse and Yonkers. With NYPA's assistance, each city created an energy master plan to reduce community and municipal energy consumption, serving as a leader and providing models for other cities to adopt. Plan goals are to reduce energy consumption; strengthen reliability and resiliency of cities' energy infrastructure; catalyze clean energy investment and economic development; contribute to a cleaner environment; and enhance quality of life.
Birmingham	AL	212,157	The City is interested in partnering with local governments to advance climate solutions. The City is also working with UAB to help advance climate solutions for the City.
Fontana	CA	213,000	The City partners with our local utility companies and the San Bernardino Council of Governments and is also a member of the San Bernardino Regional Energy Partnership Program
Fremont	CA	230,000	As detailed above, Alameda County has launched East Bay Community Energy, a community choice aggregation program

			that will provide cleaner, more renewable, lower-emissions electricity to residents and businesses and invest in the buildout of local renewable energy resources. EBCE has completed a Local Development Business Plan that explores opportunities for accelerating the development of clean energy assets within Alameda County. The plan addresses seven key areas, analyzing 1) future distributed energy opportunities on both the grid side and 2) and customer side; 3) creative implementation approaches to scaling renewables such as collaborative procurement, rate design, feed-in-tariffs, and fuel switching; 4) workforce development, financing, and ownership models; 5) energy equity considerations; 6) integrated resource planning including energy storage considerations; and 7) fiscal and economic impact scenario planning.
Reno	NV	240,000	The City of Reno collaborates with local governments through our participation in the Urban Sustainability Directors Network, and we advance energy efficiency through participation in the City Energy Project.

Small Cities (< 100,000 people)

Lambertville	NJ	3,906	The city form the South Hunterdon Renewable Energy Cooperative consisting of the city of Lambertville, the LMUA, the Township of WA and the School district.
Aspen	CO	6,870	The City of Aspen partners with the local governments, businesses and utilities to drive the clean energy transition throughout the valley.
Riverbank	CA	25,000	SF PUC is our partner at the Industrial Complex
Laurel	MD	27,150	Possibly interested in working with local governments to advance climate solutions through renewable electricity as well.
Pullman	WA	33,730	Solar and we have partnered with Avista in a solar farm in Lind WA
West Hollywood	CA	35,000	West Hollywood is part of the Westside Energy Partnership, USDN, CPA, and ICLEI, working with other local governments on solutions to climate change, energy efficiency programs, and renewables.
Culver City	CA	38,883	The CPA is a Community Choice Aggregation organization is currently made up of 29 cities and two counties in Southern California that will purchase electricity for sale to their communities.
Everett	MA	43,340	Everett would be interested with partnering with abutting cities. Everett has a positive rapport with it's surrounding cities.
Saint Louis Park	MN	49,029	We have piloted a number of programs and resources in partnership with local agencies that are now available to other cities to use that helps them work towards renewable energy goals.
Margate	FL	53,284	ILA already in place with Broward County for the Go Solar program.

Revere	MA	55,000	Develop a workshop with surrounding communities to meet monthly to discuss regional strategies
Corvallis	OR	56,000	We are always open to partnering with the community to advance objectives from our Climate Action Plan.
San Rafael	CA	58,000	We partner with all other local jurisdictions county-wide through the Marin Climate and Energy Partnership
Woodland	CA	59,068	Valley Clean Energy Alliance, also known as VCE, is a joint powers authority and CCA formed by the City of Davis and Yolo County and joined by the City of Woodland in 2017. VCE enables the jurisdictions to have local control of electricity procurement decisions, which includes efforts to advance climate solutions through renewable electricity procurement, projects, and programs.
Redmond	WA	60,560	Working regionally through the King County-Cities Climate Collaboration (K4C)
Burnsville	MN	61,290	We are a 2017 Step 5 city in the MN GreenStep City Program (Highest step available). Participates in the Regional Indicators Initiative Program. Participates in the Buildings, Benchmarks, and Beyond Program. Participates in the SolSmart Program.
Dublin	CA	61,656	The city joined the Alameda County Community Choice Aggregation Program, East Bay Clean Energy (EBCE), at its inception. EBCE aims to achieve a renewable energy portfolio that is higher than the California Renewable Portfolio Standard of 33% renewable energy generated by 2020 and to develop local renewable energy projects.
Encinitas	CA	65,000	Considering a community choice energy program, San Diego Association of Governments, San Diego Climate Collaborative, and North Coast Energy Action Collaborative.
Weston	FL	66,603	Willing to listen to options
Camden	NJ	74,420	All options will be considered
Schaumburg	IL	74,446	The Village could partner with the Schaumburg Township District Library, Schaumburg Park District and Schaumburg Township to determine interests in using solar energy solutions, identify barriers to implementing solar, and how the village could help to reduce those barriers.
Evanston	IL	75,000	Mayor Steve Hagerty joined Mayors for 100% Clean Energy on June 22, 2017. Mayors For 100% Clean Energy is an initiative calling on all mayors -- regardless of political party, from big cities and small towns -- to support a vision of 100% clean and renewable energy in their cities, towns, and communities, and across the country.
Alameda	CA	78,906	Alameda Municipal Power and other municipally owned utilities in northern California have partnered on renewable landfill gas projects, geothermal, and hydro-power (small and large).
Gary	IN	79,803	The City is interested in exploring ways to reduce electricity bills for its own operations and for its citizens.
Napa	CA	80,000	The City participates with a county-wide sustainability organization that provides opportunities for local jurisdiction staff to get informed and share up-to-date information on what is

			happening in each of the nearby communities regarding climate and energy plans as well as provide coordination opportunities between jurisdictions.
Avondale	AZ	82,881	Working closely with other local governments in the Sustainable Communities Network and Urban Sustainability Directors Network.
Bloomington	IN	85,071	The City is interested in working with all stakeholders to advance climate solutions and sustainability initiatives.
Duluth	MN	86,000	Working with the county already and the state. Would love to do more.
Nashua	NH	87,882	Recently joined with Boston and surrounding cities in an RFI for a renewable energy placement.
Santa Barbara	CA	90,000	Same as above.
San Leandro	CA	90,465	San Leandro is a member of the EBCE, a CCA formed by 11 jurisdictions in Alameda County. In addition we are members of East Bay Energy Watch which primarily has a focus on energy efficiency but also promotes programs such as building electrification which is tied to renewable energy use. Finally we are member of SunShares which is a consortium of local governments and private businesses that provide incentives for renewable energy projects.
Miami Beach	FL	91,562	We are already partnering with several networks including USDN, SSDN, and FSDN to collaborate with other local governments to transition to renewables and advance climate solutions. However, it would be interesting to specifically partner with local governments that do not own their utility, are a red state, have the same barriers as us, and were able to thrive and accomplish their RE goals.
Carson	CA	95,000	The City's participation in a CPA shows that the City is willing to partner with other local governments to advance climate solutions.
